

REMARKS

In the action, the Examiner identifies eight separate species, each corresponding to different figures of applicants' specification, and directs applicants to elect a single disclosed species for prosecution on the merits.

For purposes of addressing the Examiner's election requirement, applicants' system illustrated in FIG. 1 may include any of the structural features illustrated in FIGS. 2, 3 and 9, and includes an Engine Controller (44) having any one or more the various software structures illustrated in FIGS. 4-8 stored therein. In this regard, all of applicants claims 1-34 thus read on the system of FIG. 1, and applicants accordingly elect species I, wherein claims 1-34 are readable thereon, for substantive examination.

Respectfully submitted,

Jeffrey A. Michael
